Description :

Hand Wash Station (Product Code: SLE/SAH/29) is a self-contained, portable sink unit used to wash hands with soap and water in places that have no plumbing or electricity, such as school entrances, playgrounds, canteens and outdoor events. Its easy-fill 45 L tank supplies up to 225 hand washes of 20 seconds, and a foot-operated tap keeps the water supply hands-free. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Self-contained hand wash unit; no plumbing or electrics required
Clean water tank	45 L, easy-fill

Location	Indoor or external/outdoor use; suitable for high-footfall areas
Includes	Soap dispenser, wastewater tank/drain and stable support
Construction	Cleanable
Documentation	Refill/cleaning instructions
Product code	SLE/SAH/29
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Portable Hand Wash Station Used For?

Washing with soap and running water is the standard way to remove dirt and germs from hands, but many sites lack a sink where people actually gather. This unit brings a complete wash point to a school gate, a sports ground, a temporary classroom or a field laboratory: users press the foot pedal for water, take soap from the dispenser, dry their hands with a paper towel and drop it in the bin, without touching the tap.
