| Instruments in set | 3 |
| Artery forceps | Kocher, 140mm, straight |
| Dressing forceps | Standard, 155mm, straight |
| Scissors | Deaver, 140mm, straight, sharp/blunt |
| Intended setting | Health facility and dispensary; considered part of any minimal investment |
| Material | Corrosion-resistant surgical stainless steel |
| Finish | Passivated |
| Sterility | Supplied non-sterile |
| Use | Reusable, with cleaning/steam-reprocessing instructions |
| Documentation | Numbered complete bill of materials |
| Product code | SLE/MD/03 |
| Manufacturer | Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India |

### What Is a Dressing Instrument Set Used For?

A dressing set gives the nurse or health worker a dedicated group of instruments for removing old dressings, cleaning around a wound with swabs and applying fresh gauze without touching the wound by hand. The dressing forceps pick up and hold swabs and gauze, the Kocher artery forceps give a firm grip where one is needed, and the Deaver scissors cut gauze, tape and bandage.

The set's description states that all dressings within a hospital or dispensary must be made with this minimum set of instruments, all sterile. Facilities therefore usually keep several sets, so that one is in use while others are being cleaned and sterilised according to their own procedures.

### What to Specify When Ordering

- Number of sets, based on daily dressing numbers and sterilisation turnaround.
-
