Finish	Passivated
Sterility	Supplied non-sterile
Use	Reusable, with cleaning/steam-reprocessing instructions
Documentation	Numbered complete bill of materials
Product code	SLE/MD/04
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Suture Instrument Set Used For?

The suture set gives trained clinical staff the core instruments for closing a wound: the Mayo-Hegar needle holder grips the curved suture needle, the tissue forceps hold the wound edge, the Kocher artery forceps clamp, and the Deaver scissors cut sutures. The scalpel handle and double-ended probe are used when an abscess has to be opened and explored, and the set's description also l

Sutur tely; choos the facilit grip
