Child weighing routines with weighing trousers

Two-person weighing at a survey station. One team member hangs the 25 kg dial spring scale at eye level and hooks the strap loop onto its lower hook. The second slips the child's legs through the openings and lowers the child until the trousers carry the weight. The reader calls out the figure and the recorder writes it down.

Rotating pairs in a busy session. Number each pair and set the scale to zero every time a different pair goes on the hook. A soiled pair goes straight into a laundry bag, and the next child goes into a clean one. Wash and dry the used pairs at the end of the day before they are packed again.

Weight and height at one visit. After weighing, the child moves to a portable length-height board for standing height, or lies on it for length if under two years old. Babies who ng sling
