Product Name :

Scale, Physician, Adult, Metric, 6-180kg

Product Code :

SLE/AE/010

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Standing adults are weighed on this floor-standing beam scale from 6 kg up to 180 kg, in 100 g steps. Black numbers on a silver surface can be read from both sides, so the clinician and the person on the platform both see the result. It has an attached hand pole and adjustable feet, but no height rod.

Adult physician beam scale specifications

Parameter	Detail
Type	Beam-type mechanical scale for adults
Capacity	6–180 kg
Minimum graduation	100 g
Readout and display	Metric (kg); black numbers on a silver surface, readable from both sides and in low light
Reading time	Less than 15 seconds, with stabilising mechanism
Zero setting	Easy zero adjustment
Hand pole and height rod	Hand pole attached; height rod not included
Levelling	Adjustable feet for horizontal levelling
Body and calibration screw	Metal only (stainless steel or epoxy-coated steel); stainless steel calibration screw
Product code	SLE/AE/010
Minimum order	10 units
Dispatch	Usually within 7 to 10 working days
Manufacturer	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

Clinic routines with the adult beam scale

Adult assessment station. Weigh the person on the beam scale, then measure standing height on a portable length-height board, since this model has no rod. Mid-upper arm circumference taken with an adult MUAC tape completes the record.

Accuracy check. With the platform empty, confirm the zero. Then stack enough cast alloy masses of known value in the centre of the platform to pass the 6 kg lower limit, and compare the beam reading with their total. Adjust with the calibration screw if the zero has drifted, and log the date of the check.

Antenatal or occupational-health follow-up. Weigh each person on the same scale, at a similar time of day, without shoes or heavy items, so that monthly readings can be comp
