Measuring slide	Glides smoothly; lockable or friction-held; wobble of about 0.2 cm at most over the full length; reading point marked by arrow orpictogram
Folding and carrying	Folds up; panels held by self-contained spring-loaded bolts; handle at the point of balance and/or removable shoulder or back strap
Set-up	No tools needed; no calibration needed, as all parts have fixed positions
Construction	Light, strong material with a smooth finish for cleaning; resists high humidity and heat; water splash proof and shock resistant
Product code	SLE/AE/011
Minimum order	10 units
Dispatch	Usually within 7 to 10 working days
Manufacturer	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

Measuring tasks with the full-range length-height board

Household survey round. Measure each family member in turn: babies lying with the board flat, everyone else standing barefoot with it upright. Weigh the same people on a mother and child scale and take arm circumference with an adult MUAC tape, so one visit gives a complete record for the family.
