Shelf life	Shelf life depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted
Product code	SLE/SAH/03
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the 500 ml Hand Sanitizer Used For?

An alcohol-based hand rub is used to clean hands when soap and running water are not close by — at office desks, reception counters, classroom doors, staff rooms and at home. The 500 ml pump bottle suits a fixed spot on a desk or shelf, where people take one pump, rub it over all surfaces of both hands and let it dry fully; it does not replace handwashing when hands are visibly dirty.

Because the product contains 60-80% alcohol, it is flammable: keep bottles away from flames, heaters and direct sun, close the pump when not in use, and place dispensers where young children can use them only under supervision. Its fragrance-free, dye-free formula is useful in shared spaces where some users are sensitive to scents.

What to Specify When Ordering

- Number of 500 ml pump bottles.
- Any exact alcohol percentage your policy requires within the 60-80% range, so it can be confirmed for the quoted batch.
- Whether smaller personal bottles or gel sanitizer from the same range should be quoted together.
