Description :

Toothpaste for Children 75ml (Product Code: SLE/SAH/04) is a 75 ml, neutral-flavoured, non-fluoride toothpaste used for children's daily tooth brushing at home, in boarding schools and in hygiene-kit distributions. It is formulated without fluoride so it can also be issued in regions where drinking water already carries excess fluoride. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Shelf life	Depends on the batch and storage conditions; ask us for the expiry date of the batch you are quoted
Labelling	Age-specific directions
Product code	SLE/SAH/04
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Children's Toothpaste Used For?

This toothpaste is part of a child's daily oral hygiene routine and is often packed into school hygiene kits with a soft children's toothbrush. The neutral flavour keeps it acceptable to children who dislike strong mint, and the fluoride-free formula lets programmes issue one product across districts where groundwater fluoride is already high.

Teachers and caregivers usually show younger children how to use only a small smear of paste, brush all tooth surfaces gently and spit out rather than swallow. Brushing time in school health sessions is a good moment to pair the toothpaste with handwashing practice.

What to Specify When Ordering

- Number of 75 ml packs for children.
- Whether the adult 75 ml toothpaste is needed for the same distribution.
- Whether children's toothbrushes should be quoted with the toothpaste.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, Ambala, Haryana, India, which manufactures this children's toothpaste within its personal hygiene range. The comp
