Bristle retention	Bristles must not fall out with normal use
Safety	All toothbrush components safe for use
Packing	Individually wrapped
Bristles	Soft
Pack	Individually packed
Product code	SLE/SAH/07
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Adult Toothbrush Used For?

This brush is the adult counterpart in a hygiene kit: an adult-size handle and head for daily cleaning of teeth, with medium-hardness bristles that give a firmer scrub than a child's soft brush. Organisations issuing personal kits to workers, hostel residents or displaced families typically include one brush per adult together with toothpaste and soap.

Medium bristles suit most adults, but users should still brush with gentle pressure to protect the gums. Because each brush comes individually wrapped, stock can be stored and distributed without the brushes touching one another, and each recipient opens a clean brush. Rinse after use, store upright to dry and replace the brush when bristles start to fray.

What to Specify When Ordering

- Number of adult toothbrushes (commonly one per adult in the kit).
- Whether soft children's toothbrushes are needed for the same distribution.
- Whether adult toothpaste should be quoted with the brushes.
