Description :

Soap Box Plastic (Product Code: SLE/SAH/08) is a two-piece plastic soap box used to store and carry a bar of soap in personal hygiene kits, hostels, bathrooms and field camps. It is made of boilable plastic, so the box can be cleaned in boiling water when kits are reused or shared. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Item	Soap box
Construction	Two-piece
Material	Boilable plastic
Features	Closure/drainage
Product code	SLE/SAH/08
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Plastic Soap Box Used For?

A soap box keeps a bar of soap clean between uses and stops it picking up dirt when it is carried in a bag or left on a shelf. The two-piece design separates into a base and a cover, so the user can open it at the wash point, use the soap and close it again for storage or travel. It is a small but practical item in family hygiene kits, school boarding supplies and camp distributions where people share washing areas.

Because the plastic is boilable, the box can be cleaned thoroughly in hot water before being reissued. Let the soap drain and the box dry with its cover open when possible, so the bar does not sit in water and soften.

What to Specify When Ordering

- Number of soap boxes (usually one per soap bar or per kit).
- Whether soap bars should be quoted with the boxes.
- Any colour or packing preference for your distribution, so we can check availability.

Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, manufactures this plastic soap box in Ambala, Haryana, India. The company manufactures small hygiene accessories alongside soap, toothpaste and grooming items, so buyers can place one order for a complete kit. Export orders are documented under Importer-Exporter Code AAECJ8618A (DGFT), and the company's GST registration is 06AAECJ8618A1ZT. More on the ScienceLab profile page.
