Design	Ergonomic, with smooth action
Material	Corrosion-resistant metal
Product code	SLE/SAH/09
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Metal Nail Clipper Used For?

Short, clean nails are a simple barrier against dirt collecting under the nail, which is why nail care is taught alongside handwashing in school health lessons and included in many family hygiene kits. This medium-size clipper, around 60-70 mm long, is large enough for adults to grip firmly yet compact enough to store in a small personal kit.

To use it, trim nails straight across in small cuts rather than one large snip, then smooth any rough edges. Clean the clipper with soap and water after each use and dry it before storing; when a clipper is shared within a household, wiping the blades between users is a sensible habit. Adults should trim young children's nails for them.

What to Specify When Ordering

- Number of nail clippers.
- Preferred finish, stainless steel or chromium plated, if your programme specifies one.
- Whether other personal hygiene items should be quoted as part of the same kit.

Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, manufactures this metal nail clipper in Ambala, Haryana, India. The company manufactures grooming and personal-care items for institutions, NGOs and humanitarian kit packers and lists them with soap, toothbrushes and toothpaste so the whole kit can be quoted in one go for India and international markets. See the ScienceLab profile page for company background.
