Description :

Pan and "P" Trap For Squatting Plate (Product Code: SLE/SAH/12) is a moulded latrine pan with a P-shaped trap, used to fit a 120 x 80 cm squatting plate when building or upgradinglatrines for schools, communities and emergency camps. The pan is moulded in polypropylene(PP) and bolts to the underside of the plate, while the HDPE trap is fixed to the pan with theadhesive provided. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**,Ambala, India.

Specifications

Parameter	Detail
Item	Pan and "P" trap for squatting plate
Fits squatting plate	120 x 80 cm
Pan material	Moulded PP (polypropylene)
Pan fixing	Bolted to the underside of the squatting plate using the fasteners provided
Trap material	Moulded HDPE
Trap fixing	Fixed to the pan using the adhesive provided
Trap types in the range	"P" trap (this item) and goose neck trap (listed separately), both moulded in HDPE
Product code	SLE/SAH/12
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Latrine Pan and P Trap Used For?

A squatting plate on its own leaves an open drop hole; adding a pan and trap turns it into a flushed latrine that is cleaner to use and easier to keep free of smells. The pan guides waste from the plate opening into the trap, and a trap of this shape generally holds a small water seal after flushing, which helps stop odours and flies from coming back up from the pit or drain.

Installation is simple: the PP pan is bolted to the underside of the 120 x 80 cm plate with the supplied fasteners, and the HDPE trap is then bonded to the pan outlet with the supplied adhesive. Let the adhesive cure as directed before first use, and keep a container of water near the latrine so users can flush after every visit.

What to Specify When Ordering

- Trap type: this "P" trap version, or the goose neck trap version listed separately.
- Confirmation that your squatting plates are the 120 x 80 cm size.
- Number of pan-and-trap sets (one per squatting plate).
- Whether squatting plates, slab moulds or latrine superstructures should be quoted together.
