Description :

Child Potty (Product Code: SLE/SAH/23) is a simple, robust plastic potty used for toilet training and for the hygienic collection of young children's faeces in homes, shelters and early-childhood spaces. It measures approximately 20 cm in diameter and is designed to stand stable on the floor while a child uses it. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a laboratory equipment supplier in India that also sources child hygiene items.

Specifications

Parameter	Detail
Type	Child potty
Material	Plastic
Diameter	Approximately 20 cm
Stability	Stable on the floor
Design	Simple and robust
Product code	SLE/SAH/23
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Child Potty Used For?

Small children are often too young to use a latrine safely, and their faeces carry the same germs as those of adults. A potty gives them a safe, familiar place to go, and lets caregivers collect the waste and empty it into a latrine instead of leaving it near the home. That makes the potty a simple but useful part of family hygiene kits, child friendly spaces and early-childhood centres.

After each use, empty the potty into a latrine or toilet, wash it with soap and water, rinse and leave it to dry, and wash both the child's and the caregiver's hands. Placing the potty on a flat floor makes the most of its stable base, and its robust plastic body stands up to daily washing.

Manufacturer

The Child Potty is manufactured by Jain Scientific Equipments Private Limited, which uses the trading name ScienceLab and is based in Ambala, Haryana. Programmes, childcare centres, institutions and dealers in India and international markets can order it together with soap, toothbrushes and other family hygiene items. Visit the ScienceLab profile to learn more about the company.
