Description :

Universal Disinfectant Spray (Product Code: SLE/SAH/35) is a ready-to-use surfacedisinfectant used to clean and disinfect hard surfaces in healthcare, school, laboratory and otherhygiene-critical settings. Its neutral pH formula needs no mixing or dilution and is suitable forrubber, plastic, metal, acrylic glass, PVC and anodised aluminium, supplied in a 1 litre spraybottle. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Form	Ready-to-use disinfectant spray; no mixing, dilution or dispensing errors
pH	Neutral
Compatible surfaces	Rubber, plastic, metal, acrylic glass, PVC and anodised aluminium
Action time	Fast-acting; stated to inactivate all enveloped viruses in less than 1 minute
Stated efficacy	Stated effective against E. coli, Hepatitis B and C virus, HIV, H1N1, Norovirus, Ebola and more
Handling	Safer to handle than stronger cleaning chemicals such as chlorine
Pack	1 litre spray bottle
Shelf life	Shelf life depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted.
Product code	SLE/SAH/35
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Universal Disinfectant Spray Used For?

This spray is meant for the hard surfaces that get handled all day: bench tops, trays, plastic apparatus, metal stands, rubber mats, acrylic screens and PVC-covered furniture. Because it arrives ready to use, staff simply spray the surface, leave it wet for the contact time, and wipe it with a clean cloth. There is no concentrate to measure, so the strength is the same whoever does the cleaning.

Clean away visible dirt before disinfecting, work in a ventilated space, and never mix the spray with bleach or other cleaners. The neutral pH and the fact that it is gentler to handle than chlorine make it practical for school labs, sick bays and clinics. Colleges and institutions sourcing lab consumables in India often keep a bottle at every practical bench.
