Description :

Plastic Bin with Flat Lids (Product Code: SLE/P/50) is a 50-litre black plastic bin with a flat lid used to collect waste or store bulk materials in laboratories, preparation rooms, workshops and classrooms. Its chemical-resistant body suits lab areas where splashes of reagents are likely, and the flat lid keeps the contents covered. The bin is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for lab waste disposal and storage needs.

Specifications

Parameter	Detail
Capacity	50 litres
Material	Plastic
Colour	Black
Lid	Flat lid
Chemical resistance	Chemical resistant
Product code	SLE/P/50
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a 50 Litre Plastic Bin Used For?

In a laboratory the bin serves as a covered container for general waste and packaging, or for bulk items such as spare plasticware waiting to be used. The flat lid keeps contents out of sight and gives a level top, and the 50-litre size suits a lab corner or preparation room rather than an individual bench.

Keep sharps, broken glass and hazardous chemical waste out of a general bin; they need dedicated containers under your institution's waste rules. Empty and wipe the bin regularly, and label it clearly if it is kept for one specific waste stream.

Manufacturer

Jain Scientific Equipments Private Limited, the company behind the ScienceLab name, manufactures this plastic bin as one of the lab-support items it makes for institutions. As a laboratory equipment supplier in India, it lets schools, colleges, laboratories and dealers add bins to a larger laboratory order and receive a single quotation from Ambala, Haryana. Company details are on the ScienceLab profile.
