Description :

Aluminium Mop Handle with Polypropylene Grip (Product Code: SLE/HE/15) is a threaded, anodised aluminium handle used to carry a mop or other cleaning head for floor cleaning inwards, laboratories, corridors and washrooms. Housekeeping teams choose it for its 1365 mmlength and light 0.36 kg weight, finished with a coloured polypropylene grip. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a lab consumables supplierin India that also sources hygiene items for hospitals and schools.

Specifications

Parameter	Detail
Handle type	Threaded handle with a coloured grip
Material	Anodised aluminium shaft; polypropylene grip
Length	1365 mm
Width x height	29 mm x 29 mm
Weight	0.36 kg
Intended use	With the hygiene-range cleaning products it is listed with
Product code	SLE/HE/15
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Aluminium Mop Handle Used For?

The handle is the reach part of a mopping set: the cleaning head screws onto the threaded end, and the operator works the floor standing upright instead of bending. Its 1365 mm length suits most adult users, and at 0.36 kg it adds little weight to a wet mop, which matters on long shifts in wards, corridors and teaching labs where floors are cleaned several times a day.

Anodising gives aluminium a harder, more corrosion-resistant surface than bare metal, so the shaft copes with repeated contact with water and cleaning solutions. Many hospitals use colour-coded grips to keep tools for toilets, wards and kitchens apart; if you follow such a scheme, ask which grip colour will be supplied before ordering. Rinse and dry the handle after use and store it hanging rather than standing on its head.

What to Specify When Ordering

- The number of handles needed per ward, floor or building
- The grip colour, if your site uses colour-coded cleaning tools
- The heads you plan to fit, so thread compatibility can be confirmed
- Whether buckets and mop heads should be quoted with the handles
