Packaging	Easy-to-dispense box, styled packaging
Typical settings	Schools, hotels and anyone needing soft, strong tissues
Product code	SLE/SAH/38
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are 2-Ply Facial Tissues Used For?

A box of tissues on the teacher's desk, in the school sick room or at a hotel reception lets people cover a cough or sneeze, wipe a runny nose or dab their face without reaching for a shared towel. The two-ply construction gives a sheet that is soft on the skin yet strong enough not to tear when wet, and the dispensing box hands out one tissue at a time so the rest stay clean.

Good tissue etiquette is simple: use a tissue once, drop it straight into a lined bin, and then wash or sanitise hands. Facial tissues are not meant for cleaning optics or wiping chemical spills, so labs should keep them for personal use only. Institutions that order general supplies from a school lab equipment supplier in India often add tissue boxes to classrooms and staff rooms in the same order.

Manufacturer

These facial tissues are manufactured by Jain Scientific Equipments Private Limited, operating as ScienceLab, as part of its range of hygiene consumables for schools, hotels, offices and institutions. Buyers can combine everyday hygiene items with laboratory equipment in one enquiry. Find out more on our company profile.
