Cleaning	Frame and panel wipeable; can be cleaned and disinfected
Panels	Cleanable
Includes	Complete installation hardware
Product code	SLE/HE/17
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Freestanding Partition Wall Used For?

Businesses, local authorities, schools and colleges use these partitions to build Covid-19 testing booths and to separate members of the public, staff and students. Placed between two people, the panel gives the person completing a test some privacy and puts a physical barrier between them and the next person in line. Several walls set side by side can form a row of booths or screen off a waiting area from a test desk.

Because the wall stands on its own feet, it can go wherever a barrier is needed without drilling floors or walls, and it can be lifted aside when the room returns to normal use. Keep the feet clear of walkways and check the spigot joints are fully seated after each move. The aluminium and PVC surfaces can be wiped down and disinfected between users.

What to Specify When Ordering

- The number of walls needed for the booths or screens you are planning
- Whether any positions need mobile screens on castors instead of fixed feet
- Signs or pods to be quoted with the partitions
