Description :

Medical Nebulizer (Inhaler) (Product Code: SCL306/053) is a compressor nebulizer used to turn liquid medication into a fine mist for inhalation in respiratory tract treatment at hospitals, clinics and in home care. It delivers a compressor air flow of 8 LPM at up to 2 bar, with interchangeable jet caps and a user-selectable medication rate, in a compact and lightweight body. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Compressor nebulizer
Compressor air flow	8 LPM
Maximum pressure	2 bar
Noise	65 dB
Operating temperature	10 to 40 °C
Power supply	220 V / 50 Hz
Jet caps	Interchangeable
Medication rate	User selectable, listed as giving shorter inhalation time
Build	Compact, lightweight and durable
Cleaning	Easy to clean and maintain; listed as dishwasher-safe and autoclavable (confirm which parts)
Includes	Mask/mouthpiece, tubing, medication cup, filter and power supply
Product code	SCL306/053
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Compressor Nebulizer Used For?

A compressor nebulizer pumps air through a small jet in the medication cup, breaking the liquid into droplets that the patient breathes in through a mouthpiece or mask. It is used for inhaled treatment of the respiratory tract when a patient finds a hand-held inhaler difficult, including children and older people. The selectable medication rate lets the clinician match the output to the treatment, and the interchangeable jet caps allow the nebulizing set-up to be changed.

For daily use, place the compressor on a firm surface within the listed 10 to 40 °C operating range and keep the air inlet unobstructed. Clean the medication parts after each treatment; the listing describes the nebulizer as dishwasher-safe and autoclavable, so ask us which parts this applies to. The listed noise level is 65 dB.
