Description :

Gloves, Chemical Resistant (Product Code: SLE/G/15) is a heavy-duty, unsupported neoprene-over-natural-rubber-latex glove used for handling chemicals, cleaning agents and wet materials in laboratories and industrial work. It is neoprene dipped with a diamond embossed grip, and its listed applications are laboratory use, battery manufacturing, food processing and automotive manufacturing. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab consumables supplier in India.

Specifications

Parameter	Detail
Construction	Unsupported, heavy-duty
Material	Neoprene over natural rubber latex
Finish	Neoprene dipped
Grip	Diamond embossed grip
Applications	Laboratory use, battery manufacturing, food processing, automotive manufacturing
Product code	SLE/G/15
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Chemical Resistant Gloves Used For?

In chemistry labs these gloves are worn while preparing and pouring solutions, cleaning up spills and washing glassware with cleaning agents. The listed industrial uses cover battery manufacturing, food processing and automotive manufacturing, where hands meet liquids, fluids and wash-down work. The diamond embossed pattern helps keep hold of wet bottles and containers.

No glove resists every chemical, so check the safety data sheet for each substance and ask us about the chemicals you use before relying on this glove. Inspect it for swelling, cracks or discolouration, rinse the outside before taking it off, and remember that it contains natural rubber latex.

Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, manufactures these neoprene-over-latex gloves for chemistry departments, college labs, industrial training centres and dealers. We manufacture them to go with the chemistry glassware, aprons and safety items that labs already order from us, for delivery in India and international markets. Our company profile has more about the business.
