Product Name :

ABS Braking System Training Board Simulator

Product Code :

SLE/MCE/60

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

ABS Braking System Training Board Simulator (Product Code: SLE/MCE/60) is a training board used to teach the layout and working of an anti-lock braking system (ABS) in automotive training workshops and engineering classrooms. Instructors in ITI, diploma and degreeautomotive courses use it to explain how ABS keeps wheels from locking under hard braking, andits detailed specification is confirmed with each quotation. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Product type	Training board simulator
System covered	ABS (anti-lock braking system)
Intended use	Teaching and demonstration in automotive training
Technical specification	Confirmed on request with your quotation
Product code	SLE/MCE/60
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the ABS Braking System Training Board Used For?

An anti-lock braking system watches the speed of each wheel and, when one begins to lock during hard braking, rapidly reduces and restores the brake pressure to that wheel so the driver keeps steering control. Studying ABS on a training board lets students follow this sequence of wheel-speed sensing, control-unit decision and pressure modulation without working under a vehicle.

Training boards of this kind are used in motor vehicle courses to connect conventional brake hydraulics with vehicle electronics and fault diagnosis. For colleges and ITIs sourcing lab equipment for technical institutes, it is a natural next step after a basic hydraulic brake model. Because configurations vary, ask us for the current specification sheet before you finalise an order.

OEM Manufacturer

ScienceLab is the brand of Jain Scientific Equipments Private Limited, the OEM (original equipment manufacturer) of the ABS Braking System Training Board Simulator. The board is made at the company's own licensed factory at Saha, Ambala, Haryana, India, and the specification you receive with a quotation comes from the manufacturer itself rather than a reseller. Repeat orders and replacement parts are handled the same way, so please ask us. Company details are on the ScienceLab profile.
