Description :

Landform Relief Maps (Product Code: SLE/ES/03) is a set of seven raised relief maps accompanied by a detailed study guide, designed to take students on a geological tour without leaving the classroom. Each map shows a distinct geographic formation in three dimensions, so learners can feel and see how the shape of the land surface relates to the geology beneath it.The set is used by geography and earth science teachers in middle and secondary schools and in teacher-training colleges, and is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, a geography models manufacturer in India based in Ambala.

Specifications

Parameter	Detail
Type	Raised relief maps with study guide
Number of maps	Seven
Map content	Each map displays a distinct geographic formation
Teaching focus	Links surface topography with the underlyinggeology
Size (as listed)	21 in x 32 in
Printed material	Detailed study guide

Typical Use

Flat contour maps ask students to imagine height from lines on paper; a raised relief map removes that step. Laid out on benches around the room, the seven maps can be used as a rotation: small groups spend a set time at each formation, trace ridges and valleys with a finger, sketch a cross-section, and then use the study guide to explain which rock structures produced the surface they have just examined. Teachers often finish by asking groups to compare two formations and describe how differences in geology led to different landscapes.

The maps also work well alongside a topographic sheet of the same area type, helping students translate between contour spacing and real slope. Because the set combines a durable visual resource with a written guide, many schools add it to the lab equipment list for a new geography room. Handle the raised surfaces gently, avoid pressing sharp pencils onto the relief, and store the maps flat or upright in a dry place between lessons.

Manufacturer

These maps come from Jain Scientific Equipments Private Limited, the Ambala, Haryana company whose teaching aids are sold under the ScienceLab name to schools, colleges and distributors. For institutional buyers who need vendor registration details, the company's GSTIN is 06AAECJ8618A1ZT and its LEI is 3358004HRD1JIVXKYX49. More about the business is available on our company profile.
