Product Name :

Investigating Geological Time And Fossils Chart

Product Code :

SLE/ES/09

Description :

The **Investigating Geological Time And Fossils Chart** (Product Code: SLE/ES/09) is a revised, multi-colour wall chart that sets out the entire geologic time scale using current geologic dating information. Representative fossils from the corresponding geologic periods are mounted directly on the chart, so students see real specimens beside the period in which those organisms lived. Measuring 18 in x 24 in and supplied with a wood frame, it gives a geography, geology or biology room a permanent reference display. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, one of the school science lab equipment suppliers in India.

Specifications

Parameter	Detail
Type	Multi-colour geologic time scale chart with mounted fossils
Coverage	Entire geologic time scale, with current dating information
Specimens	Representative fossils mounted beside their geologic periods
Size	18 in x 24 in
Frame	Wood frame
Edition	Completely revised
Also listed	Geological Time & Fossils Chart Transparency

Typical Use

Deep time is hard to picture, and a chart that pairs each period with an actual fossil makes the sequence concrete. Teachers use it as the anchor for a lesson on the eras and periods, pointing out how the mounted specimens change from simple marine forms to more complex life as the scale moves forward. Students can then be given unlabelled fossils or pictures and asked to place them on the chart, justifying each choice from the features they see.

Hung at eye level, the chart becomes a reference that students return to throughout a unit on rocks, fossils and evolution, and it works alongside a biology chart set in school labs across India. Keep it out of direct sunlight to protect the colours, dust the frame with a dry cloth, and avoid touching the mounted fossils.

Supplier

Jain Scientific Equipments Private Limited, which operates under the ScienceLab name in Ambala, Haryana, supplies mounted specimen charts such as this to schools and colleges together with its own laboratory equipment. Visit the company profile to learn more.
