Description :

Storage Boxes – Rock – Mineral Specimens (Product Code: SLE/ES/18) are compartmented collection boxes that keep individual rock and mineral samples separated, visible and easy to put back in place after a lesson. Earth science teachers, geography departments and college geology rooms use them to organise reference sets and student-collected field samples. Built from rugged polystyrene and leather-finished cardboard, they are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its range of educational laboratory equipment in India.

Specifications

Parameter	Detail
Product type	Collection box for storing rock and mineral specimens
Construction	Rugged polystyrene and leather-finished cardboard
Sizes offered	Four sizes available
Listed box size	40-cell box
Cell size (40-cell box)	1.5 x 2 (as listed in our catalogue)
Suitable for	School and college rock and mineral collections in earth science and geography

Typical Use

Teachers usually place one specimen per cell, with a small numbered label beneath each sample, so the box doubles as an identification key during practical classes. Keeping every rock or mineral in its own compartment stops softer samples such as gypsum or talc from being scratched by harder neighbours, and it turns end-of-term stock-taking into a quick visual check. The 40-cell format suits a reference set that a class works through over several lessons.

As part of a school laboratory setup in India, boxes are commonly organised on shelves by theme – igneous, sedimentary and metamorphic rocks, or ores and common minerals – so students can take out one set at a time. Keep the boxes flat and away from damp, handle the cardboard parts with dry hands, and clean the polystyrene surfaces with a dry cloth rather than water.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, a company based in Ambala, Haryana, that produces teaching apparatus for earth science, physics, chemistry and biology laboratories. Specimen storage like this box is sent to schools and colleges in India and international markets; more background is on our company profile.
