Description :

Set Of 5 trays And Lids (Product Code: SLE/ETP/24) is a pack of five lidded storage trays used to keep kit ancillaries, writing materials and A4 printed sheets safe and organised in engineering science teaching labs. Because the trays are identical to those used for the engineering science kits, they fit and stack in the same way as the kit trays already on the shelf. This lab equipment accessory is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Contents	Five trays with lids
Suitable for storing	Ancillaries, writing materials or A4 size printed material
Compatibility	Identical to the trays used for the kits, so they fit and stack in the same way
Product code	SLE/ETP/24
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are the Trays and Lids Used For?

In a shared lab, small ancillaries tend to drift from one kit to another and go missing by the end of term. Giving each bench group its own lidded tray keeps those pieces together, and worksheets or lecturer notes printed on A4 paper stay flat and clean under the lid instead of getting creased in a drawer.

Since the trays match the kit trays, a technician can stack spare trays on top of the kits and keep a tidy, uniform shelf. A simple label on each lid (group name, lab number or contents) speeds up issue and return during a practical session. For a school lab setup that is growing kit by kit, the set is an easy way to add storage that looks and stacks like the rest of the range.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, which supplies this set of trays and lids to accompany its engineering science kits. Buyers can combine the trays with kits and other laboratory items in a single enquiry, which keeps purchasing simple for schools, colleges, dealers and importers. Company details are on the ScienceLab profile page.

Related Laboratory Equipment

The trays are most useful alongside the engineering science kits and panel they are designed to sit with.

- Engineering Science Work Panel — the perforated metal bench panel on which engineering science kits are set up.
- Gear Trains Kit — spur, bevel and worm gears whose small parts benefit from tray storage.
- Potential And Energy Kit — pendulum, spring and flywheel kit for energy experiments
