Product Name :

Switches (Econ) with Fahnstock clips

Product Code :

SLE/PHY/90

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Switches (Econ) with Fahnstock clips (Product Code: SLE/PHY/90) is a pack of economy switches used to open and close simple circuits in school electricity practicals. Each pack holds25 switches fitted with Fahnstock (Fahnestock) spring clips, so bare wire ends can be connected without screwdrivers or soldering, a practical choice when equipping a whole class. They are manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Switch type	Economy switch
Connections	Fahnstock (Fahnestock) spring clips
Pack size	25 switches
Product code	SLE/PHY/90
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are the Economy Switches with Fahnstock Clips Used For?

An economy switch lets pupils control a circuit by hand, so they see a lamp, buzzer or motor respond the moment the circuit is completed or broken. The spring clips grip a wire when pressed and released, which makes setting up and clearing away circuits quick for younger students and avoids small terminal screws going missing. With 25 switches in a pack, one pack can equip a typical class working in pairs or small groups.

Use the switches in low-voltage circuits powered by cells. Strip a short length of insulation from each wire, push it fully into the clip, and leave the switch open until the rest of the circuit is connected. They are a low-cost part of basic physics lab equipment for schools setting up electricity practicals.

What to Specify When Ordering

- Number of packs required (each pack contains 25 switches).
- Any lamp holders, cells or leads to be quoted with the switches.
- Delivery location for the order.

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, manufactures these economy switches as the OEM at its own factory at Saha, Ambala, Haryana. Packing them in 25s straight from the factory keeps class quantities simple for schools, dealers and importers. When stocks run low, ask the manufacturer directly for repeat packs. The ScienceLab profile explains more about the company.
