Product Name :

Photovoltaic Cells

Product Code :

SLE/ESA/07

Description :

- It uses a commercially available solar panel made from high efficiency cells.
- A solarimeter on the frame measures incident radiation.
- The equipment also includes a second lower rated battery.
- A control module contains the charge controller.
- The panel recharges a choice of two batteries through a charge controller.
- The frame holds a high performance deep cycling battery in a storage box.
- The control module has digital displays and shows the panel and battery storage performance.
- It has indicators to show when the charge controller is in float mode and load cut mode.
- The charge controller recharges the battery at the correct rate of charge without damage to the battery.
- The solar panel is on a wheeled, lightweight frame that allows adjustment of panel angle, relative to the sun.
- This allows students to examine the charge and discharge cycle of the system in a typical laboratory session.

A separate loading unit includes:

- A variable resistive load to show battery performance.
- An inverter to show practical conversion to AC voltages.
- Four switchable lamps to show a practical application.

Contact Science Lab for your Educational School Science Lab Equipments. We are school educational lab equipments manufacturers, school lab equipment export, school lab equipment exporter, school lab equipment manufacturer, school lab equipment manufacturers, school lab equipment manufacturers in india.
