Product Name :

Simple Circuit Module Push Switch

Product Code :

SLE/PHY/93

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Simple Circuit Module Push Switch (Product Code: SLE/PHY/93) is an on/off push-button switch mounted on a base, used to open and close simple circuits in school electricity lessons. As part of the Simple Circuit Modules series, it lets pupils control LED boards, motors and buzzers from the same range with a press of a button. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, together with its other physics lab equipment in India.

Key Details

Parameter	Detail
Series	Simple Circuit Modules
Module type	Push switch
Action	On/off push button
Mounting	On base
Companion modules	LED boards and other Simple Circuit Modules (listed separately)
Product code	SLE/PHY/93
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Push Switch Module Used For?

The push switch module gives pupils a hands-on way to see how a switch controls a circuit: press the button and the circuit changes state, press again and it changes back. Placed in series with an LED board it demonstrates a complete and a broken circuit. With two switch modules, pupils can model an output that works only when both switches are on (series) or when either one is on (parallel), a first step towards AND and OR logic.

Because the switch is fixed to its own base, it stays in place on the bench while pupils rearrange the rest of the circuit. Leave it in the off position while connecting the supply, and press the button firmly rather than striking it. It is a durable piece of junior science lab equipment for early electricity topics.

What to Specify When Ordering

- Number of push switch modules, for example two per group for series and parallel work.
- Other Simple Circuit Modules required: red or green LED boards, motor, buzzer or lamp holder.
- Delivery location for the complete order.

Supplier

Jain Scientific Equipments Private Limited, known by its trading name ScienceLab, supplies the Simple Circuit Modules range, including this push switch, from Ambala, Haryana, India. Ordering the switch, indicator and motor modules together lets the company quote the whole set at once. Repla b profil
