Description :

Hands-On Cell Model Act-Plant (Product Code: SLE/ECB/01) is a tactile plant cell model usedto teach cell structure to Grades 3 to 8 through an activity in which pupils lift out, name andreplace each part. It is made of resilient, colourful EVA foam with removable parts, shows theplant cell only, and comes with reproducible worksheets and cross-curricular labs. It is suppliedby **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as primary and middle-school biology lab equipment.

Key Details

Parameter	Detail
Type	Hands-on cell model with removable parts
Cell shown	Plant cell only
Material	Resilient, colourful EVA foam
Suitable for	Grades 3 to 8
Teaching support	Reproducible worksheets and cross-curricular labs
Product code	SLE/ECB/01
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Hands-On Plant Cell Model Used For?

Younger learners understand a cell far better when they can take it apart. Teachers pass the model around a group, ask pupils to remove each part, say what it does, and fit it back in the right place, turning the lesson on plant cell structure into an activity rather than a diagram to copy. Because the parts are foam, they are light, quiet on the desk and easy for small hands to manage.

The reproducible worksheets let the same model serve several sections of a class, and the cross-curricular labs link cell biology with other subjects in the timetable. For schools choosing a plant cell model in India for the junior classes, it works well at the start of a unit, before pupils progress to observing real plant cells, such as onion peel, under a microscope. Keep the removable parts together in a labelled box after each lesson so that none go missing.

Supplier

ScienceLab is the trading name of **Jain Scientific Equipments Private Limited**, Ambala, Haryana, India, which supplies this hands-on plant cell model to schools, education departments and distributors in India and international markets. Teachers can order it together with animal cell models, posters and microscopes in one enquiry to equip a complete cell-biology unit. Visit our company profile to learn more.
