Product Name :

Animal Meiosis Plaque

Product Code :

SLE/ECB/05

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Animal Meiosis Plaque (Product Code: SLE/ECB/05) is a large teaching plaque used to explain reduction division (meiosis) of the animal cell in school and college biology classrooms. Teachers use its single 46 x 61 cm (approx.) display, with the key cards included, to show how the chromosome number is halved when gametes form. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, for schools that need a clear mitosis meiosis model in India.

Specifications

Parameter	Detail
Type	Teaching plaque, animal cell meiosis
Process shown	Reduction division (meiosis) of the animal cell
Key cards	Included
Size	46 x 61 cm (approx.)
Weight	2 kg (approx.)
Product code	SLE/ECB/05
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Animal Meiosis Plaque Used For?

Meiosis is one of the harder topics in secondary and first-year college biology, because students must follow chromosomes through two divisions and understand why the number is halved. The plaque lets the teacher trace that sequence in front of the class: homologous chromosomes pairing and separating, sister chromatids parting in the second division, and the resulting cells carrying half the original chromosome number. That foundation then supports later lessons on variation and inheritance.

Use the key cards first as a teaching aid and later as a quick check, asking students to name each feature before revealing the card. Keeping the plaque on display for the whole unit helps learners revisit the sequence when they study mitosis or work through prepared meiosis slides under the microscope.

OEM Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, is the OEM (original equipment manufacturer) of the Animal Meiosis Plaque and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Because the plaque comes straight from the maker rather than through a trader, schools, colleges, dealers and importers deal with the same company for the quotation, repeat orders and any replacement key cards — just ask us. More about the company is on our company profile.
