Product Name :

Bug Box, Gridded

Product Code :

SLE/EZ/02

Description :

Bug Box, Gridded (Product Code: SLE/EZ/02) is a small acrylic viewing jar with magnifying lenses, used to hold live insects and other minibeasts so students can examine and measure them in the classroom or the field. The first lens gives 2x magnification, a second fold-down lens raises it to 4x, and a measuring grid on the bottom of the 6 cm jar lets learners estimate body length. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a biology lab equipment supplier in India.

Specifications

Parameter	Detail
Jar material	Acrylic
Jar diameter	6 cm
Magnification	2x; 4x with the second lens folded down
Base	Measuring grid on the bottom
Product code	SLE/EZ/02
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Gridded Bug Box Used For?

A bug box lets children and students look closely at a living insect, spider or snail without handling it. Start at 2x to find the animal and watch how it moves, then fold down the second lens for a 4x view of legs, mouthparts, wing veins or body segments. The grid printed on the base turns observation into measurement: learners can count squares to estimate the animal's length and record it alongside a sketch, which suits primary science, middle-school biology and ecology survey work.

Keep the box out of direct sun, observe for a short time and release animals where they were found. Wipe the acrylic with a soft damp cloth rather than solvents to avoid clouding. Used with a collecting net and a sorting tray, gridded bug boxes give each group a simple kit for insect study, and a class set is a useful biology teaching aid for schools in India.

What to Specify When Ordering

- The number of bug boxes, for example one per student or per pair.
- Whether you also need collecting nets or sorting trays for field sessions.
- The delivery location and any packing requirements for classroom sets.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Bug Box, Gridded from Ambala, Haryana, to primary and secondary schools, colleges, nature clubs and distributors in India and international markets. Class quantities can be quoted together with other zoology field i
