Product Name :

Taming The Tables

Product Code :

SLE/LP/03

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Taming The Tables (Product Code: SLE/LP/03) is a card-and-dice game used to make multiplication tables up to 9 automatic in primary maths classrooms. Teachers use it to move children from reciting tables to recalling facts quickly, with six card sets covering the tables of 3,4, 6, 7, 8 and 9. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, alongside other mathematics lab kits for schools.

Key Details

Parameter	Detail
Card sets	Six sets of cards for the multiplication tables of 3, 4, 6, 7, 8 and 9
Dice	Two dice: a number dice and a times dice
Tokens	20 rubber tokens
Activity guide	Write-up with details of the activities
Learning goal	Automatising multiplication tables up to 9
Game levels	Can be played at different levels, depending on the challenge needed
Other concepts	Seeing patterns in multiplication tables; practising dodging tables
Product code	SLE/LP/03
Manufacturer	ScienceLab (Jain Scientific Equipments Pvt Ltd), Ambala, India

What Is Taming The Tables Used For?

Knowing a table by chanting it from the start is not the same as knowing a single fact on demand. Rolling the number dice and the times dice produces a random pairing, so children cannot lean on the chanted sequence; they have to recall the product directly. Practising these “dodging” tables, where facts come out of order, is what turns slow counting-up into instant recall.

Because the six card sets are separate, a teacher can hand a beginner the table of 3 while a confident classmate works with mixed 7s and 8s, and raise the level as recall improves. Laying one card set out in order is also a good moment to look for patterns — for example, how the digits of each answer in the table of 9 add up to 9. The rubber tokens can be used to keep score, which keeps a small group engaged in a maths corner or as part of the lab equipment a school keeps for activity periods.

Supplier

Taming The Tables is supplied by Jain Scientific Equipments Private Limited, which trades under the ScienceLab name from Ambala, Haryana. Primary schools, maths-lab coordinators, tutoring centres and dealers in India and international markets can order it on its own or with other number-sense games from the same range. Company background is on the ScienceLab profile page.
