Description :

Number Card (101 cards) (Product Code: SLE/LP/09) is a set of 101 number cards showing the numbers 0 to 100, with hooks to hang them, used to support numeral recognition in early primary maths. Hung in sequence, the cards give children a constant reference for where each number sits and help them connect a written numeral to the quantity it represents. The set is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its school lab equipment range for early-years classrooms.

Key Details

Parameter	Detail
Cards	101 number cards
Numbers	0 to 100
Display	Hooks to hang the cards
Concepts	Numeral recognition; consolidating number location; connectingsymbol to quantity
Product code	SLE/LP/09
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Number Card Set Used For?

Hung in order along a line or wall, the 101 cards form a number line from 0 to 100 that stays in view all day. Children point to numbers as they count, find a number's neighbours, and notice that every tenth card begins a new decade — the pattern that later supports place value.

Because each card hangs on its own hook, the teacher can take a few down and ask which numbers are missing, or mix up a short stretch and have pupils rehang it in the right order. Both are quick ways to consolidate number location. Matching a card with a group of counters or other objects links the numeral to the amount it stands for.

Supplier

The Number Card (101 cards) set is supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala in Haryana. Nursery and primary schools, remedial-learning programmes and dealers in India and international markets order it for classroom walls and maths corners. Company information is on the ScienceLab profile.

Related Primary Maths Kits

Number-sense materials that follow on from the hanging number line:

- Empty Number Card (Set of 5) — a companion card set from the same Primary range.
- Number Sticks — grouping tens and ones once numbers to 100 are familiar.
- Digit cards — building 3-digit and 4-digit numbers as the next step.
