Product Name :

Chamber with Lid

Product Code :

SLE/EZ/12

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Chamber with Lid (Product Code: SLE/EZ/12) is a two-chamber container used to hold small animals and observe how they choose between conditions in school biology and animalbehaviour practicals. The two chambers are joined by an escape-proof passageway, and a tight-fitting lid keeps the critters contained while students watch. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its zoology equipment for schools.

Key Details

Parameter	Detail
Layout	Two chambers connected by a passageway
Passageway	Escape-proof
Closure	Tight-fitting lid to contain the critters
Supplied with	Lid
Product code	SLE/EZ/12
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Chamber with Lid Used For?

Two linked chambers let a class run a simple choice experiment: make conditions different on each side, release a few small animals, and record where they settle over time. Typical comparisons are damp against dry, dark against light, or two different food sources. Because the animals can move freely through the passageway but cannot escape, the results reflect their own preference, which leads naturally into discussions of habitat and survival.

Woodlice, beetles and other small invertebrates collected in the school grounds suit this kind of test. Line each chamber with a paper towel, moisten one or cover one to darken it, and count the animals in each side at regular intervals. Move animals with a soft brush or spoon, keep the lid closed between counts, and release them where they were found afterwards. It is a low-cost way to add insect collection and behaviour work to school biology lab equipment.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the chamber with lid from Ambala, Haryana, India. Schools, science centres, colleges and distributors can order single units or class quantities, and add collecting nets and trays to the same quotation, with delivery across India and to international markets. More information is on the company profile page.

Related Zoology Equipment

Items for collecting and observing the animals used in the chamber:

- Bug Box, Gridded — for holding and measuring individual minibeasts after collection.
- Insect Net, Economy — for catching flying and grass-dwelling insects to study
