Description :

Number Sticks (Product Code: SLE/LP/15) is a set of 200 sticks with rubber band and a wooden dice, used to teach place value by bundling and regrouping tens and ones in early primary maths. Designed for up to 4 children aged 6–9 years, it turns the carry-over and borrowing steps of addition and subtraction into something children can see and handle. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a school science kit supplier in India, as a junior lab kit for primary school number work.

Specifications

Parameter	Detail
Sticks	200
Bundling	Rubber band, to structure the sticks into groups
Dice	Wooden dice marked 0–5, for the game
Activity guide	Write-up with details of the activities
Group size and age	Up to 4 children, 6–9 years
Concepts	Counting and regrouping objects into tens and ones; expanding a number by place value; place value with addition and subtraction; carry-over and borrowing in the algorithm; place value built on number sense
Product code	SLE/LP/15
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Number Sticks Used For?

Children count out ten loose sticks and bind them into a bundle, so “one ten” becomes an object they can hold rather than a word. A number such as 16 is then built as 1 bundle and 6 loose sticks, which is its expanded form made concrete. Reading the bundles and loose sticks back as a written number connects the objects to the digits.

The 0–5 wooden dice adds a game element: as sticks are collected, ten loose ones must be bundled before play continues, which is carry-over in action. In subtraction the reverse happens — a bundle is opened to give ten ones, which is exactly what borrowing means. Once children can explain these moves with sticks, the written algorithm makes sense instead of being a set of rules.

Supplier

Number Sticks are supplied by Jain Scientific Equipments Private Limited, whose trading name is ScienceLab, from Ambala in Haryana. Primary schools, early-learning centres and dealers in India and international markets order them for maths corners and group sets. The company profile has more information.
