Product Name :

Microscope Cover Slips

Product Code :

SLE/EZ/19

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Microscope Cover Slips (Product Code: SLE/EZ/19) are thin, pre-cleaned covers placed over specimens on microscope slides to flatten and protect wet mounts in school, college and teaching laboratories. Each slip measures 22 x 22 mm with a thickness of 0.13 to 0.16 mm, and they are described as non-fogging and non-sticking, with no bubbles, scratches or striations. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as a routinemicroscopy consumable within its range of biology lab equipment in India.

Specifications

Parameter	Detail
Dimensions	22 mm x 22 mm
Thickness	0.13 – 0.16 mm
Condition	Pre-cleaned
Surface	Non-fogging, non-sticking
Quality	No bubbles, scratches or striations
Pack size	Not stated — confirmed on quotation
Product code	SLE/EZ/19
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Microscope Cover Slips Used For?

Almost every temporary mount in a biology practical, from onion peel and cheek cells to pond water and stained tissue, needs a cover slip. It spreads the drop of water or stain into a thin, even layer, keeps the specimen flat so it stays in focus, slows drying under the lamp, and stops liquid touching the objective lens. Thin cover slips leave room for higher-power objectives to focus close to the specimen.

To avoid trapped air, touch one edge of the slip to the drop and lower it slowly with a needle or probe. Hold slips by their edges, or pick them up with forceps, as fingerprints show up clearly under magnification. Cover slips are fragile, so collect broken pieces in a dedicated glass-waste container. They are an everyday item on any list of microscope slides and school microscopy supplies in India.

What to Specify When Ordering

- The quantity you need; the pack size is not listed, so we confirm it on the quotation.
- Plain or cavity microscope slides to be supplied with the cover slips.
- Any mounting tools, such as teasing needles or droppers, for the same practical.
