Description :

Insect Net, Economy (Product Code: SLE/EZ/21) is a lightweight collecting net used to catch butterflies, grasshoppers and other insects for study in school biology projects and college entomology fieldwork. It pairs a 36 in handle, 5/8 in in diameter, with a soft micromesh bag 16 in deep on a 10-1/2 in hoop, and it is easy to carry on field trips. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Handle length	36 in
Handle diameter	5/8 in
Net	Soft micromesh
Hoop diameter	10-1/2 in
Bag depth	16 in
Weight class	Lightweight, easy to carry
Product code	SLE/EZ/21
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Insect Net Used For?

An insect net is the starting point for most entomology activities: sweeping through long grass to sample the insects living there, or catching a single butterfly or dragonfly in flight. After each sweep or swing, a quick turn of the wrist folds the deep bag over the hoop and traps the catch until it can be moved into a viewing box. The soft micromesh is gentle on delicate wings and legs, which matters when insects are to be released after study.

Class sweep-net surveys work well when every group uses the same net and the same number of sweeps, so results can be compared between habitats. Keep the net away from thorny bushes and water, check the bag for snags after each outing, and store it hung up and dry. Together with viewing boxes and pins, it forms the core of an insect collection kit for schools.

OEM Manufacturer

This economy insect net is made by Jain Scientific Equipments Private Limited, the company behind the ScienceLab name and the original equipment manufacturer (OEM) of the product. Nets are assembled at its own licensed factory at Saha, Ambala, Haryana, India, and sold factory-direct to schools, colleges, nature clubs, dealers and importers. Class quantities and replacement nets are arranged by the manufacturer itself, so ask us. More is on the company profile page.
