Description :

Giant Ant Farm (Product Code: SLE/EZ/22) is a large ant habitat used to watch ants dig tunnels and organise their colony over several weeks in classrooms and science clubs. At 15 x 10 in, it comes with clean tunnelling sand, a 24-inch clear connecting tube, a tunnel starter tool and a water feeder, giving students everything needed except the ants to begin observing. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Size	15 x 10 in
Tunnelling medium	Clean tunnelling sand
Connecting tube	24-inch, clear
Tools	Tunnel starter tool
Watering	Water feeder
Live ants	Not listed as included — ask us
Product code	SLE/EZ/22
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Giant Ant Farm Used For?

Ants are social insects, and an ant farm lets a class see what normally happens underground: workers digging and extending tunnels, carrying sand grains to the surface, moving food and caring for the colony. Because the tunnels change from day to day, students can sketch or photograph the farm at the same time each day and build a record of how the network grows, a long-running project in social insect behaviour.

Use the tunnel starter tool to make a few shallow openings that encourage the ants to begin digging, and keep the sand lightly moist with the water feeder. Keep the farm out of direct sunlight and away from heaters, feed sparingly, and never mix ants from different colonies, as they will fight. It adds a living element to school biology lab equipment and nature study.

What to Specify When Ordering

- The number of ant farms, for example one per class or one per science club.
- Whether you need help with a source of ants, since live ants are not listed as included.
- Any viewing boxes or magnifiers you want on the same order.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the giant ant farm from Ambala, Haryana, India. Schools, colleges, activity centres and educational dealers can order it alongside other insect study equipment, with delivery across India and to international mark
