Description :

Leaf Identification Kit (Product Code: SLE/EBT/02) is a set of real tree leaf specimens used to teach students to classify and identify trees from their leaves in school biology and nature-study lessons. Designed for grades 3-12, it holds 39 carded, labelled and bagged tree leaves with a 61-page Tree Finder book and a leaf key. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, among its biology teaching aids.

Specifications

Parameter	Detail
Grade level	Grades 3-12
Specimens	39 real tree leaves
Specimen presentation	Carded, labelled and bagged
Reference book	61-page Tree Finder book
Identification aid	Leaf key
Learning activity	Classify and identify real leaves
Product code	SLE/EBT/02
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Leaf Identification Kit Used For?

Identifying a tree from its leaf teaches careful observation. Students look at whether a leaf is simple or compound, how leaflets are arranged, the shape of the blade, the margin (smooth, toothed or lobed) and the pattern of veins, then follow the leaf key step by step, choosing between paired descriptions until they reach a name. The Tree Finder book supports the same process and helps students check their answers. Because the kit deals with the real world around students, it keeps learners of all ages engaged.

Younger classes can sort the carded specimens into groups by shape or margin before using the key; older students can time themselves against the key, discuss where it was ambiguous, or build their own simple dichotomous key. The labels give the teacher an instant answer check. As part of the botany lab equipment for a classification unit, the kit also prepares students for a schoolyard or park walk to identify local trees. Keep specimens in their bags between lessons so they stay flat and intact.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, an Ambala, Haryana company that supplies natural-specimen resources such as this leaf collection to schools and colleges in India and international markets. Buyers can have the kit quoted together with microscopes, models and other botany items in a single enquiry. Read more on the company profile.
