## Description :

**Leaf & Seed Games** (Product Code: SLE/EBT/04) is a science activity kit used to teach young children to predict, classify, measure and collect data with real leaves and seeds in pre-primary and primary classrooms. Aimed at grades Pre-K to 4, it offers a series of 8 games built around 20 leaf and 20 seed specimens, with instructions and an activity guide. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

### Specifications

| Parameter | Detail |
|---|---|
| Grade level | Pre-K to grade 4 |
| Games | Series of 8 games |
| Leaf specimens | 20 |
| Seed specimens | 20 |
| Specimen presentation | Carded, labelled and bagged |
| Teacher support | Instructions and a guide with hands-on activities |
| Skills practised | Predicting, classifying, measuring and collecting data |
| Product code | SLE/EBT/04 |
| Supplied by | Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India |

### What Are Leaf & Seed Games Used For?

At this age, science is about noticing and sorting. Games built around real leaves and seeds invite children to guess which seed belongs to which kind of plant, group leaves by shape or edge, line specimens up from smallest to largest, and count or tally what they find. Each game turns a basic science skill into play, and across the series of eight children practise predicting, classifying, measuring and recording data with objects they can also find in their own playground.

Teachers can run a game as a whole-class circle activity, set up stations for small groups, or send pairs outside to find similar leaves and compare them with the cards. As a hands-on science kit for primary school classrooms, it works well before a nature walk or a seed-planting activity. Supervise the youngest children so that seeds are not put in mouths, and return each specimen to its bag after play.

### Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, supplies this game set to nurseries, primary schools and early-years centres in India and international markets. Buyers can combine it with other primary science resources in one quotation. See the company profile for more about the company.
