Description :

Forceps (Tweezers) (Product Code: SLE/EDE/08) are 125 mm stainless steel forceps with a fine point, designed for picking up and holding small, delicate material that fingers cannot manage cleanly. Students use them to peel epidermis, lower cover slips, lift thin sections and move seeds or small insects, which makes them a standard item in any temporary slides biology kit. They are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for schools, colleges and research laboratories.

Specifications

Parameter	Detail
Product type	Forceps (tweezers)
Material	Stainless steel
Size	125 mm
Tip	Fine point
Suitable for	Slide preparation, handling small specimens and fine dissection work

Typical Use

The classic first practical for these tweezers is the onion peel mount: the fine point grips the thin inner layer of a scale leaf, peels it away in one strip and lays it flat in a drop of water on the slide. The same tips then hold a cover slip at an angle and lower it slowly to keep air bubbles out. In dissection, they lift membranes and small organs, and in ecology or plant biology lab equipment sets they pick up seeds, leaf fragments and minibeasts for closer study.

Hold the forceps like a pen and apply gentle pressure; fine points are for gripping, not for prying or levering, which can spring the tips out of line. Wipe them clean after each use, dry them, and store them so the points are not knocking against other steel instruments in a drawer.

Manufacturer

ScienceLab is the brand of Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597), an incorporated private limited company headquartered in Ambala, Haryana. The company manufactures at its licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala (Factory Licence AMB-ONLINE-CHD-J-414). Learn more on the company profile page.

Related Dissection Equipment

Other gripping tools and slide items that work alongside these forceps:

- Forceps (Tweezers) Bent — a curved fine-point version for reaching around tissue.
- Forceps — shorter stainless steel forceps with precision ground points.
- Forceps, Nylon — a non-metal option where steel should not touch the sample.
- [illegible]
- [illegible] bare.
