Product Name :

Magnifier, Foldable

Product Code :

SLE/M/96

Description :

Magnifier, Foldable (Product Code: SLE/M/96) is an upright plastic stand magnifier used to enlarge small objects 2x for hands-free observation in school science and nature-study lessons. Its large 4-inch (about 10 cm) plastic lens locks into place when opened, and an inch/centimetre grid gives learners a scale for judging size. This hand lens magnifier for schools in India is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Upright, foldable stand magnifier that locks into place
Lens	Plastic, 4 in (approx. 10 cm) diameter
Magnification	2x
Reference scale	Inch/centimetre grid
Product code	SLE/M/96
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Foldable Magnifier Used For?

Young learners use a 2x stand magnifier to look closely at leaves, seeds, insects, fabric weave, printed dots, soil and sand grains without having to hold a lens steady. Because the lens stays upright once it is locked open, a pupil can turn a specimen with one hand and sketch it with the other, and a small group can take turns at the same object on the desk.

The inch/centimetre grid turns looking into measuring: line up a seed or a small insect against the grid and estimate its length in both units. Plastic lenses scratch more easily than glass, so wipe the lens with a soft cloth rather than paper towel and fold the magnifier flat for storage in a tray or drawer. When pupils need to see cells or fine structures, a microscope is the natural next step.

Supplier

Jain Scientific Equipments Private Limited trades as ScienceLab and supplies this foldable plastic magnifier from Ambala, Haryana, to primary and middle schools, nature clubs, science centres, dealers and importers in India and international markets. Classroom quantities can be quoted together with other observation tools, so a teacher can equip a whole class in one enquiry. Read more about the company on our company profile page.

Related Laboratory Equipment

Items that pair well with the foldable magnifier in observation and nature-study lessons:

- Pocket Magnifier — a hand-held lens pupils can carry outdoors
- Minibeast Magnifier — for watching small creatures up close
- Leaf Identification Kit — leaves to examine and classify under the lens
