Product Name :

Integer Dice

Product Code :

SLE/LMS/02

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Integer Dice (Product Code: SLE/LMS/02) is a maths learning aid used to generate positive and negative numbers for practising integer operations in middle school classrooms. Rolling the dice turns adding, subtracting and multiplying signed numbers into quick games that give every pupil plenty of practice. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM school lab equipment manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Type	Dice for positive and negative number (integer) practice
Range	Middle School learning aids
Product code	SLE/LMS/02
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are Integer Dice Used For?

Integers are often the first topic where middle school pupils meet rules that feel counter-intuitive, such as subtracting a negative number. Dice make practice quick and varied: pupils roll, write the resulting integer sentence, solve it and check with a partner, so many different examples come up in a single lesson. Games such as racing along a number line from zero, or scoring the largest product, keep the whole class involved.

Pair the dice with a number line or two-colour integer counters so that pupils can model each roll before calculating, then move on to mental methods once the rules are secure. Give each group its own dice and a tray or cup to roll into, which keeps noise down and stops dice going missing. As the listing does not state the number of dice, faces or number range, confirm these details with us before planning activities around them.

What to Specify When Ordering

- The quantity you need, for example one set per group of pupils
- The number range and faces you expect, so we can confirm the current design
- Whether integer counters or an integer board game should be quoted together

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, the OEM (original equipment manufacturer) of these Integer Dice, which it makes at its licensed factory at Saha, Ambala, Haryana. Schools, tutoring centres, dealers and importers in India and international markets buy them direct from the manufacturer, usually alongside other maths manipulatives, and repeat or follow-up orders are handled by the same team.
