Description :

Bug Box (Product Code: SLE/LSM/02) is a small circular viewing pot used to hold insects and other small objects so children can see them magnified during nature study in primary classrooms and outdoor lessons. The pot is 50 mm in diameter and gives 4X magnification, making it asimple addition to an insect collection kit for school field trips. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a school science kit supplier in India.

Specifications

Parameter	Detail
Shape	Circular pot
Diameter	50 mm
Magnification	4X
Use	Holding bugs and small objects for magnified viewing
Product code	SLE/LSM/02
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Bug Box Used For?

Children gently place an ant, beetle, woodlouse, seed or petal in the pot, close it and look in to count legs, spot antennae or follow the veins on a leaf. Because the creature is held inside the pot, pupils can watch it move without handling it, and several children can take turns looking at the same find.

For school groups it works as a hands-free alternative to a hand lens magnifier, since nobody has to hold the subject and the lens at the same time. Keep observation times short, keep the pot out of direct sun, and release living creatures where they were found before cleaning the pot for the next lesson.

Supplier

ScienceLab is the name under which Jain Scientific Equipments Private Limited, Ambala, Haryana, supplies the Bug Box to primary schools, nature clubs, activity centres and dealers in India and international markets. It is a sourced item within our Science Material range. Institutions that need vendor registration details can note the supplying company's GSTIN, 06AAECJ8618A1ZT, and its Legal Entity Identifier, 3358004HRD1JIVXKYX49. More is on the ScienceLab profile page.

Related Science Material

Pair the Bug Box with these items for a complete minibeast lesson:

- Bug Box, Gridded — gridded viewer for estimating the size of a find
- Insect Net, Economy — for catching insects before viewing them
