Description :

Linen Tester (Product Code: SLE/LSM/05) is a fold-up 10x magnifier used to examine the fine texture of cloth, paper, skin and other surfaces in school science and textile lessons. Studentsand teachers use it when a simple hand lens is not strong enough, and its high-clarity lens foldsflat for carrying and storage. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a school science kit supplier in India, as a compact magnifier loupe for lab andclassroom work.

Specifications

Parameter	Detail
Magnification	10x
Design	Fold-up magnifier with high-clarity lens
Typical subjects	Texture of cloth, paper and skin, among other things
Product code	SLE/LSM/05
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Linen Tester Used For?

The name comes from the textile trade, where a folding magnifier is laid on fabric to inspect the weave. In a school lab the Linen Tester does the same job for any flat sample: students can see how threads cross in cotton and synthetic cloth, how fibres mat together in paper, and the fine lines and pores on the back of the hand. It also shows printed colour dots, leaf surfaces and grains of salt or sugar in clear detail.

To use it, open the magnifier and rest it over the sample, then bring your eye close to the lens and adjust until the surface is sharp. Good light from a window or desk lamp makes a big difference at 10x. Fold it closed after use to protect the lens, and never leave it in direct sunlight, where any lens can concentrate the Sun’s heat.

Supplier

The Linen Tester is supplied by Jain Scientific Equipments Private Limited, the Ambala company behind the ScienceLab name, within its Science Material range. It is offered to schools, colleges, textile and craft teaching units, dealers and importers across India and international markets. Company background is on the ScienceLab profile.

Related Science Material

These magnifiers and lens-care items suit the same close-observation work:

- Lens Big — a large, low-power hand lens for a wider view of whole objects.
- Magnifier, Foldable — an alternative folding magnifier for student sets.
- Folding Magnifier, Single — another pocket-size option for field and bench work.
