Description :

Stomach Model 2 Part (Product Code: SLE/DS/01) is an anatomical replica of the human stomach that shows the different, individual layers of the stomach wall. Its front half is removable for detailed study of the interior, and the model also depicts vessels, nerves and the lower esophagus. Delivered on a stand and weighing 0.6 kg, it is light enough to move between a classroom and a doctor's consulting room. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its human biology model set range for the digestive system.

Specifications

Parameter	Detail
Construction	2 parts; front half removable
Stomach wall	Different and individual layers shown
Structures depicted	Vessels, nerves, lower esophagus
Mounting	Delivered on stand
Weight	0.6 kg
Size	25 x 22 x 12 cm
Suitable for	Doctor's office or classroom

Typical Use

The layered wall is the feature that sets this model apart. With the front half lifted away, tutors can show how the stomach wall is built up from its inner lining to its outer covering, which is the basis for explaining how ulcers and inflammation affect different depths of tissue. The vessels and nerves show how the organ is supplied and controlled, and the lower esophagus marks where swallowed food enters.

In a clinic, a doctor can hold the model up during a consultation to explain a gastroscopy finding or a diagnosis in plain language; in the classroom it supports digestion lessons for biology and nursing students. Refit the front half carefully after use and keep the model on its stand to avoid knocks.

Manufacturer

This two-part stomach is made by **Jain Scientific Equipments Private Limited** of Ambala, Haryana, India, whose anatomy models and laboratory products carry the **ScienceLab** name. Our company profile has more about who we are.
