Description :

Tripod Cast Iron Varnished (Product Code: SLE/LR/03) is a three-legged, varnished cast iron stand base with a thread that takes a support rod, used to build retort stands for clamps, ringsand glassware in school, college and research labs. It is listed in two sizes, length 105 at 1.2 kgand length 145 at 2.0 kg, and the rod is ordered separately. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Tripod (three-legged) stand base
Material	Cast iron, varnished
Rod fitting	Thread; rod ordered separately
Sizes (A length, as listed) and weight	105 — 1.2 kg 145 — 2.0 kg
Product code	SLE/LR/03
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Cast Iron Tripod Base Used For?

A base that stands on three legs touches the bench at only three points, so it sits firmly without rocking even when the work surface is not perfectly flat. That makes this tripod a steady foundation for a retort stand: screw a support rod into the thread, fit bossheads and clamps, and hold flasks, funnels or condensers above the bench. The open space between the legs also leaves room to place a burner, beaker or small hot plate close beneath the rod.

Choose the 2.0 kg size for taller rods and heavier glassware, and the 1.2 kg size for compact set-ups on student benches. Keep the load above the legs rather than reaching far outside them, and tighten the rod fully before use. Anyone looking for a tripod stand for the lab in India should note that this is a rod base, not a burner tripod for gauze. Cast iron is strong under load but can crack if dropped, so lift it with both hands.

What to Specify When Ordering

- The size: length 105 (1.2 kg) or length 145 (2.0 kg).
- The support rods to go with it, since the rod is ordered separately.
- Any bossheads, clamps or rings for the complete stand.
- Quantity and delivery location.
