Description :

Burette Stand (Product Code: SLE/LR/10) is a cast iron titration stand used to hold a burette upright above a flask during volumetric analysis in school, college and research chemistry labs. It includes two 105 mm diameter plates, one black and one white, and an 18/10 stainless steel rod of 600 × 10 mm on which a burette holder is fitted. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of school chemistry lab equipment in India, at its own factory in Ambala, making it a burette stand for Indian labs that comes straight from the maker.

Specifications

Parameter	Detail
Type	Burette (titration) stand
Material	Cast iron
Plates (D/Ø)	2 × 105 mm, one black and one white (included)
Rod	18/10 stainless steel, 600 × 10 mm (included)
Use with	A burette holder (not listed among the included parts)
Product code	SLE/LR/10
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Burette Stand Used For?

In a titration, the burette is clamped to the rod and the conical flask sits on one of the plates directly under the tip. The white plate makes an indicator colour change easy to spot at the end point, which is why most acid-base titrations are run over white. The black plate gives contrast when the solution is pale, cloudy or forms a light precipitate, so students can switch backgrounds without moving the stand.

Check that the burette hangs vertically before filling it, and read the meniscus at eye level. The 18/10 stainless steel rod stands up to splashes of dilute acids and alkalis better than plain steel; rinse and dry the rod and plates after each session. One stand per titration station is the usual arrangement in chemistry lab equipment set-ups for India's school and college practicals.

What to Specify When Ordering

- The number of stands, usually one per titration station.
- Whether single or double burette holders should be quoted with the stands.
- Whether glass burettes and conical flasks are also needed.
