Product Name :

Foot For Rods, Stainless Steel 18/10

Product Code :

SLE/LR/11

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Foot For Rods, Stainless Steel 18/10 (Product Code: SLE/LR/11) is a stainless steel rod foot used to stand a single support rod upright on the bench in labs where corrosion resistance and easy cleaning matter. Its anti-slip rubber protection grips smooth work surfaces and helps spare the bench finish, which suits tiled, glass and epoxy tops in chemistry, biology and research labs. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, for teaching and research labs across India.

Key Details

Parameter	Detail
Type	Foot for support rods
Material	18/10 stainless steel
Base protection	Anti-slip rubber
Product code	SLE/LR/11
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Stainless Steel Foot for Rods Used For?

This foot is meant for benches that get wet or are cleaned often: beside sinks, around water baths, in microbiology rooms wiped down with disinfectant, or in any area where a painted or cast iron base would start to mark or rust. Stand a rod in it, add a bosshead and a clamp, and it will hold a thermometer, a small separating funnel or a test tube for the duration of a practical.

The rubber underside stops the foot from sliding when a clamp is tightened and prevents metal-on-surface scratches. Keep oils and strong solvents off the rubber, which can soften it, and never stand the foot on a hot plate. As with any single foot, keep loads light and centred; for heavy work choose a full stand base. It pairs well with other stainless laboratory instruments in India's teaching labs.

What to Specify When Ordering

- The number of feet required.
- The diameter of the rods you will use, so we can confirm the fit.
- Whether stainless rods should be quoted with the feet.
- Whether some positions could use the tempered cast iron Foot For Rods instead.

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, is the OEM (original equipment manufacturer) of this stainless rod foot and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Laboratories, schools and distributors order it straight from the factory, so pricing and supply are agreed with the maker.
