Description :

Retort Clamp 3 Prongs (Product Code: SLE/RC/03) is a red PVC three-prong clamp used tohold flasks, tubes and similar apparatus on a laboratory stand in school and college practicals. Itsspan width is set with two regulating screws that adjust independently, and the clamp is 140 mmlong with a diameter range listed as 12–100 mm. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Material	PVC, red
Prongs	3
Span adjustment	Span width d independently adjustable by 2 regulating screws
Length	140 mm
D/Ø (as listed)	12–100 mm
Product code	SLE/RC/03
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 3 Prong Retort Clamp Used For?

This clamp holds round apparatus such as flasks, test tubes and small columns steady on a retort stand during titration, filtration and demonstration setups. Because each regulating screw adjusts independently, the span can be set so that an off-centre or unevenly shaped item is gripped evenly, and the clamp can sit exactly where the vessel needs support.

The red PVC finish makes the clamp easy to spot on a crowded bench, a small but real help in busy practical classes, and it is an everyday piece of chemistry lab equipment in schools. As a PVC item, it should be kept clear of burner flames and hot plates; for heated work choose a stainless steel clamp instead. Tighten both screws evenly and check the hold before letting go of the vessel.

What to Specify When Ordering

- Quantity — the number of clamps needed per stand or per bench.
- Vessel sizes — share the diameters you need to hold so we can confirm them against the listed 12–100 mm range.
- Stand parts — add a stand base or other clamps from the list below if you are setting up new stations.
